Chemical & Metallurgical Engineering is the successor to Metallurgical & Chemical Engineering, which, in turn, was a consolidation of Electrochemical & Metallurgical Industry and Iron & Steel Magazine. The magazine was originally founded as Electrochemical Industry.

McGraw-Hill Publishing Company, Inc., New York City

Volume LII

January to December, 1945

GENERAL ALPHABETICAL INDEX

A

Absorbent material (A).....June 138

Acetylene:

Acetylene and oxygen plants which are surplus (table).....Oct. 99
Germans synthesize acetylene chemicals.....Oct. 206
Wartime chemical developments in German industry.....Sept. *115
Acid inhibitor (A).....May 160

Adhesives:

All-purpose adhesive (A).....June 140
Cold setting adhesive (A).....Sept. 146
Emulsion-type resin adhesive (A).....Mar. 138
Envelope adhesive (A).....May 149
Furan adhesives (A).....Sept. 146
General purpose adhesive (A).....Apr. 138
High strength adhesive (A).....Sept. 143
Laminating adhesive (A).....Sept. 146
Phenolic adhesive (A).....Apr. 138
Plywood adhesive (A).....Feb. 146
Resin adhesive (A).....Oct. 144
Resin emulsion adhesives (A).....Aug. 138
Resorcinol adhesives (A).....Dec. 141
Sealing adhesives (A).....Sept. 143
Water emulsion adhesives (A).....Feb. 163
Adsorption—surface area measurements of porous materials (A).....Mar. 310
Aging bath (E.N.).....Dec. *131

Agitation:

Agitator, jet (E.N.).....July *129
How to use rubber bearings for agitator shafts. B. D. Morgan (F.N.).....June *116
Problems in dissolving, reaction and mixing. E. S. Bassell.....May 112
Windshield wiper for agitator power. Morash & Caldwell (F.N.).....Oct. *127
Agricultural laboratory set up by Shell (N).....Sept. 172
Air conditioning—room air conditioned for exposure tests of fertilizer. J. A. Chenevey (F.N.).....Aug. *115
Air cylinder (E.N.).....June *127
Air filter, electronic (E.N.).....Aug. 127
Air flow in ducts. Nord & Ciriello (P.N.).....June *116

Alcohol:

Alcohol economics will determine future production processes. R. D. Toulsey.....Oct. *120
Alcohol from petroleum flowsheets.....Nov. *136
Alcohol lobby (ed).....Nov. 116
Ethyl alcohol made from refinery ethylene.....Nov. *96
Grape pomace, a source of alcohol and tartrates. E. K. Metzner.....Oct. 102
Mold-bran aids production of a grain alcohol. Boyer & Underkofler.....Dec. *116
New alcohol schedule.....July 88
Present industrial alcohol plants in the West (table).....Dec. 162
Production of alcohol and solvents 1940-44 (table).....Feb. 132
Recovery of grain alcohol byproducts flow sheet.....June *130
Aldehyde-containing solutions for disinfectants (A).....Mar. 230
Algeria—needs sulphur.....Mar. 168
Phosphate mine increases output.....July 180

Alkalis:

Consumption and production of alkalis in U. S. 1921-1944 (tables).....Feb. 128
Organic alkali (A).....Nov. 143
Users wanted for caustic-chlorine surplus plants. R. S. McBride.....Sept. *112
Alkyl bromides (A).....June 138
Allyl chemicals unit in operation (N).....Aug. 150

Aluminum:

Alumina from clay by sulphuric acid process.....Jan. *105
Alumina-from-clay unit to operate soon (N).....Sept. 166
Alumina produced from northwest clay. J. R. Callahan.....Dec. *108
Aluminum foil with vinyl resin coating and cloth backing (A).....Aug. 140
Aluminum-silic-lithium alloys (A).....July 224
Anodizing aluminum (A).....Oct. 238
Bayer process red mud treated for alumina recovery.....Jan. *106
Economics of Western aluminum production (table).....Oct. 246
Plans proposed on disposal of aluminum plants (N).....Oct. 156
Pacific aluminum possibilities (A).....Nov. 358
Postwar aluminum (A) (charts).....Nov. 272
Protective coating for aluminum (A).....Oct. 142
Suggestions for aluminum plant disposal (A).....Aug. 200
Surplus alumina, aluminum and magnesium plants (table).....Oct. 99
Western aluminum facilities attract industry (N).....Nov. 184
Wyoming alumina plant begins operations (N).....Aug. 156
Aluminum metaphosphate (A).....June 137
American Byproduct Coke Institute formed (N).....Feb. 146
American Ceramic Society meeting (N).....May 156
American Plant Food Council organized (N).....Aug. 162

Ammonia:

Calcium cyanamide as source of ammonia (A).....Oct. 262
Stand-by plan promised for ammonia plants.....Apr. 80
Surplus synthetic ammonia plants (table).....Oct. 99
Synthetic ammonia flowsheet.....Dec. 134
Synthetic ammonia produced from natural gas. J. A. Lee.....Dec. *94
Synthetic vs. natural.....May 82
War Department-sponsored ammonia plants.....Oct. 115
Ammonia chloride under controls.....Sept. 88
Amyl alcohol.....Aug. 86
Animals—skin and bones, how offal. W. M. Robinson.....Jan. 160
Anodizing aluminum (A).....Oct. 238
Anti-stick compound (A).....July 142
Aprons, lightweight (A).....Oct. 149
Arabia—American Oil Co.'s refinery now operating.....Nov. 180

Argentina:

Alcohol from corn produced.....Apr. 168
Exports less quebracho extract.....July 178
Exports more tartaric acid.....Mar. 168
Imports less aniline dyes.....June 162
Lead arsenate production in 1944.....Aug. 172

New site for chlorate plant.....Feb. 184
Plastics from corn (A).....Jan. 169
Sunflower seed crop.....Sept. 186
What the world expects from the United States. G. J. Dougherty.....Feb. *122

Arsenic—analysis of arsenic (A).....Apr. 218
Ash handling system, pneumatic (E.N.).....Mar. *125
Aspirator or eductor made from rubber or other non-metallics. J. A. May (P.N.).....Nov. *116

Atomic Power:

Atom bomb and German science (A).....Dec. 236
Atom bomb research at University of California (N).....Oct. 172
Atom bomb secret (A).....Oct. 256
Atomic bomb and the conquest of uranium.....Sept. *102
Blasting open the future (ed).....Aug. 112
California honored for atomic bomb work (N).....Nov. 174
Chronological highlights in atomic bomb developments.....Sept. 104
Future of atomic power.....Oct. 154
Gas diffusion—Oak Ridge gives industry a unit operation. J. F. Hogerton.....Dec. *98
Hanford plant continues at full capacity (N).....Oct. 168
How Hanford solved the problem of synthesizing an element. J. R. Callahan.....Sept. *106
Junior engineers to hear atom evaluated (N).....Dec. 154
Secondary results of atomic energy (A).....Nov. 278
Auger packer for powders (E.N.).....Apr. *126

Australia:

Fatty alcohols to be produced.....Apr. 164
Superphosphate scarcity.....Dec. 178
Titanium to be produced.....Sept. 186
Awards—A.S.M.E. presents awards (N).....Dec. 156
Kirkpatrick awarded Chemical Industry medal for 1945.....Nov. *101

B

Bactericide (A).....Feb. 146
Bag dumper (E.N.).....Oct. 129
Bandage of fiberglass (A).....Nov. 148

Batch Operation:

Economic comparison of batch and continuous processing. R. M. Crawford.....May *106
Explosives—batch versus continuous operation in the explosives industry. W. E. Berl.....May 202
How batch unit processes are made continuous. M. G. Larian.....May 114
Technical aspects of continuous process system. Olsen & Lyons.....May *118
Battery, explosion-proof (E.N.).....Feb. 146

Bearings:

Bronze bearing (E.N.).....Sept. *127
Carbon bearings (E.N.).....July 139
How to use rubber bearings for agitator shafts. B. D. Morgan (F.N.).....June *115
Motor (E.N.).....Aug. 136

Awards—A.S.M.E. presents awards (N).....Dec. 156
Kirkpatrick awarded Chemical Industry medal for 1945.....Nov. *101

B

Bactericide (A).....Feb. 146
Bag dumper (E.N.).....Oct. 129
Bandage of fiberglass (A).....Nov. 148

Batch Operation:

Economic comparison of batch and continuous processing. R. M. Crawford.....May *106
Explosives—batch versus continuous operation in the explosives industry. W. E. Berl.....May 202
How batch unit processes are made continuous. M. G. Larian.....May 114
Technical aspects of continuous process system. Olsen & Lyons.....May *118
Battery, explosion-proof (E.N.).....Feb. 146

Bearings:

Bronze bearing (E.N.).....Sept. *127
Carbon bearings (E.N.).....July 139
How to use rubber bearings for agitator shafts. B. D. Morgan (F.N.).....June *115
Motor (E.N.).....Aug. 136

- Belgium—chemical industryDec. 190
Belts—temporary repair keeps drive running. J. A. May (P.N.).....Aug. *116
Test for static conductive belts (P.N.) July *113
Benzoin, gum (A).....Sept. 160
Beryllium hardening (A).....Aug. 213
Beryllium, its sources and uses (A).....Dec. 253
Betanols—properties of betanols (table).....Dec. 143
Bismuth—eliminating bismuth codeposition (A).....May 228
Blasting cap (A).....Oct. 142
Blender, intimate (E.N.).....Feb. *145
Boilers—boiler plant design (A).....Apr. 206
Using an orifice to assist control of low pressure steam flow. D. F. Othmer (P.N.).....Apr. *132
- Bolivia:**
Glass plant increases production. July 173
New vegetable oil plant and refinery.....Apr. 166
Sulphuric acid plant constructed.....July 173
Vegetable oil refining plant.....Feb. 184
- Book Reviews:**
Adsorption. C. L. Mantell.....Jan. 241
Advances in nuclear chemistry and theoretical organic chemistry. Burk & GrummittOct. 270
Air compressors. E. W. F. Feller.....Mar. 223
Alignment charts. Maurice Kratichik June 216
Almighty atom, the real story of atomic energy. J. J. O'Neill.....Nov. 286
American Gas Association proceedings, 1944.....Dec. 266
Analysis of foods. A. L. Winton & Kate Winton.....Aug. 223
Asphalts and allied substances. Herbert AbrahamJune 215
Atomic energy for military purposes. H. D. Smyth.....Oct. 263
Automatic control engineering. E. S. Smith.....Feb. 241
The bureaucrat. J. H. Crider.....Apr. 231
Calcium metallurgy and technology. Mantell & Hardy.....Sept. 263
Cane sugar handbook. Spencer & MeadeApr. 221
Cast metals handbook.....May 242
Chemical constituents of petroleum. A. N. Bachanen.....Dec. 263
Chemical process industries. R. N. ShreveMay 239
Chemistry for electroplaters. C. B. F. YoungSept. 263
Chemistry of acetylene. Nieuwland & VogtNov. 290
Chemistry of coal utilization. H. H. LowryDec. 263
Chemistry of leather manufacture. McLaughlin & Theis.....Oct. 263
Collected papers on metallurgical analysis by the spectrograph. Ed. by D. M. Smith.....Dec. 266
Commercial methods of analysis. Snell & Biffen.....Feb. 241
Commercial waxes. H. Bennett.....Sept. 263
Continuous and staple fibre plants of Germany. J. H. Givens & others.....Nov. 292
Conversion factors and tables. Zimmerman & Lavine.....Aug. 223
Dictionary of organic compounds. Ed. by Helbron & Bunbury.....Sept. 263
Discovery of the elements. M. E. WeeksJuly 231
Ebulliometric measurements. W. Swietoslawski.....Nov. 290
Flavor. M. C. Crocker.....Sept. 263
Formaldehyde. J. F. Walker.....May 239
Fundamental principles of physical chemistry. Prutton & Maron.....Apr. 223
General chemistry. J. A. Timm.....Aug. 224
German-English dictionary of metallurgy. T. E. R. Singer.....Aug. 224
How to solve it. G. Polya.....July 231
History of color photography. J. S. FriedmanJan. 241
Inorganic chemistry. Fritz Ephraim.....Jan. 242
Industrial electric furnaces. N. V. Paschke.....Oct. 272
Industrial oil and fat products. A. E. BaileyOct. 269
Industrial organization and management. L. L. Bethel & others.....Nov. 238
Industrial plastics. H. R. Simonds.....Oct. 269
Introduction to magnesium and its alloys. John Allico.....Dec. 263
Introductory general chemistry. S. R. BrinkleyJune 216
Lead poisoning. Cantarow & Trumper Mar. 223
Major instruments of science and their applications to chemistry. Burk & GrummittNov. 286
Measurement of colour. W. D. Wright Nov. 292
Modern gas turbine. R. T. Sawyer.....May 240
National directory of commodity specifications.....Dec. 264
New plastics. Simonds & Bigelow.....July 231
New world of machines. Harland ManchesterMay 239
- Oils and fats. H. G. Kirschenbauer.....Oct. 272
Outline of the amino acids and proteins. Ed. by Melville Sahyun.....Mar. 223
Paint, paintings and restoration. Maximilian TochDec. 263
Peace, plenty and petroleum. D. T. BrooksApr. 221
Physical methods of organic chemistry. Ed. by Arnold Weissberger.....Nov. 286
Piping handbook. Sabin Crocker.....Sept. 263
Plastics catalog for 1945.....Apr. 232
Plastics in practice. Sasso & Brown July 233
Plastic molding and plant management. D. A. Dearie.....Feb. 242
Plastics—scientific and technological. H. D. Fleck.....May 240
Principio to Wheeling. E. C. May.....June 215
Proceedings of the twentieth annual convention of the National Fertilizer Association.....Jan. 241
Production, jobs and taxes. H. M. GrovesAug. 223
Prosperity—we can have it if we want it. Shields & Woodward.....June 215
Protective and decorative coatings. Vol. IV. Ed. by J. J. Mattiello.....Sept. 263
Protective and decorative coatings. Ed. by J. J. Mattiello.....Aug. 224
Rocket research. C. P. Lent.....Jan. 241
Solvents. T. H. Durrans.....Nov. 286
Technologists' stake in the Wagner Act. Ed. by M. E. McIver & others.....Apr. 224
Technology of plastics and resins. Mason & Manning.....Dec. 263
Texas looks ahead. Ed. by Lorena DrummondAug. 223
Textbook of organic chemistry. E. WertheimJuly 231
The theory of resonance and its application to organic chemistry. G. W. WhelandFeb. 241
Thermodynamic charts. Ellenwood & MackeyFeb. 241
Thermodynamic properties of air. Keenan & Kaye.....Oct. 270
Useful soybean. Mildred Lager.....Sept. 263
Uses and applications of chemicals and related materials. T. C. GregorySept. 263
Willis Rodney Whitney—pioneer of industrial research. J. T. BroderickFeb. 241
Yellow magic, the story of penicillin. J. D. Ratcliff.....Nov. 285
Borax—Searles Lake chemicals flow sheet.....Oct. *128
Boric acid—Searles Lake chemicals flow sheetOct. *128
- Brazil:**
Castor bean exports drop.....July 180
Cooperative rubber plan for Guapora.....Oct. 190
Demand for formaldehyde.....Jan. 170
Imports of ash and caustic cut down Nov. 184
Increases supply of drying oils.....Oct. 188
Need for technicians.....Sept. 184
New tannin factory.....Apr. 165
Rayon plants report larger outputs.....June 164
Sao Paulo—anhydrous ammonia manufacture.....Mar. 179
Turpentine demand active.....Apr. 166
What the world expects from the United States. Jayme Sta. Rosa.....Feb. *116
Breathing apparatus (E.N.).....Dec. *132
Bromine—Searles Lake chemicals flow sheetOct. *128
Brush cleaner (E.N.).....Dec. 132
Bucket carrier (E.N.).....Nov. *132
- Butadiene:**
Butadiene monoxide (A).....Feb. 156
Chemicals from natural gas at Texas plant of Celanese.....Aug. *97
Production of butadiene from butylenes (A).....Jan. 218
Surplus synthetic rubber, butadiene and styrene plants (table).....Oct. 100
Butane—petroleum byproducts—a big factor in organic chemical industry—reportDec. *121
Butyl alcohol—fermentation of waste sulphite liquor to develop butyl alcohol June 101
Butyl bromide and chloropropene (A).....Mar. 144
Butyl crotonate (A).....Dec. 143
- C**
Calcium carbide in Germany. R. L. Hasche (tables).....Oct. 118
Calcium—Pidgeon process produces calcium by ferrosilicon process. P. H. StaubAug. *94
- Canada:**
Extends scope of chemical output.....June 162
Flax plant under construction.....Feb. 183
New gypsum plant at Calgary.....Oct. 180
Vanillin production starts.....May 165
What the world expects from the United States. G. L. White.....Feb. *113
Car pulper (E.N.).....June *137
Carbide plant converted to use smelter slag (A)Dec. 166
- Carbon:**
Carbon activities (A).....Dec. 259
Carbon remover (A).....Mar. 142
Dry feeder developed for activated carbon. Edward Engstrom (P.N.).....Nov. *113
Industrial carbon from Oregon coals (N)Nov. 174
The nature of active carbon (A).....Jan. 212
Carbon blacks—evaluation of carbon blacks for dry cells (A).....Jan. 214
Production to be increased (N).....Apr. 154
Carbon dioxide snow (A).....Apr. 196
Cartels—three kinds (A).....Sept. 238
Cartoon of American chemists in London June *156
Casein is imported.....Aug. 86
Casting sealants (A).....May 149
Caustic, electrolytic, decolorized (AP) Apr. 200
- Caustic Soda:**
Consumption of caustic soda in U. S. 1942-1944 (table)Feb. 129
Production of caustic soda in U. S. 1921-1944 (table)Feb. 128
Users wanted for caustic-chlorine surplus plants. R. S. McBride.....Sept. *113
- Cellulose:**
Cellulose—ethyl cellulose operations—flowsheetSept. 138
Ethyl cellulose plant development. Hopewell, Va. shows integration of facilities—reportSept. 129
Ultraviolet ray absorption by cellulose derivatives (A)Sept. 256
- Cement:**
Acidproof cement (A).....Jan. 144
Calcium in Portland cements (A).....Dec. 258
Cement dustproof (A).....Sept. 162
Resinous cement (A).....Sept. 146
Central America—what the world expects from the United States. George AcunaFeb. 126
Centrifugal, continuous (E.N.).....Oct. 132
Centrifuge of new type (A).....Feb. *236
- Ceramics:**
High temperature ceramics (A).....Dec. 144
- Chemical Engineering:**
Chemical fundamentals of unit processes (A).....Oct. 254
Consultant as a business man (A).....Dec. 232
Consultant as an expert witness (A).....Nov. 268
Consultants' charges (A).....Nov. 266
Lack of scientists after the war (A).....Apr. 194
Opportunities and obligations (A).....Dec. 230
Roster of technical investigators who visited European countries on TIIC missions (N)Nov. 151
Salvage those chemical engineers. B. H. HopkinsDec. *97
Some personal aspects of foreign service for American chemical engineers. J. C. JacobsFeb. *110
What licensing could do for the chemist (A)Nov. 260
- Chemical Industry:**
The chemical industry its growth and workers. P. E. Anderson (table) Apr. 97
Chemical production in 1944 (table) Feb. 140
Expansion in West of chemical industries (table)Sept. 168
Industry forecasts its first postwar year (charts & tables).....Aug. 108
New chemicals from war (A).....Apr. 194
U. S. production, consumption and stocks of chemicals (tables) 1943-44-45. Jan. 259, Feb. 259, Apr. 240, May 252, June 235, July 248, Aug. 242, Sept. 280, Oct. 294, Nov. 316, Dec. 286
Utah chemical industries (table) Dec. 163
Workers in chemical and other industries in Utah (table).....Oct. 180
Chemical Industries Exposition (N).....Dec. 149
Chemical Market Research Assn. organized (N)July 149

Chemical & Metallurgical Engineering Reports:

- Continuous processing May *101
 Handling materials with lifting, tiering and special trucks Nov. *119
 Index to reports 1926-1945 Dec. 154
 Industrial waste, an important factor in process planning Aug. *117
 Integration of chemical plant facilities Sept. *129
 Methods that offer new tools for process control July *119
 Petroleum byproducts—a new factor in organic chemical industry Dec. *121
 Petroleum processing makes gains of wide-spread significance June *117
 Surplus property for process industries Oct. *94
 Synthetic fibers set the formula for a textile revolution Jan. *119
 Technical service value to chemical process industries Mar. 121
 What is ahead in manpower and labor relations (charts) Apr. *116
 Chemotherapy—progress and prospects in chemotherapy (A) May 228

Chile:

- Chemical industry (A) May 234
 New cellophane plant in Concepcion Nov. 180
 Penicillin production aided by government Aug. 172
 Potassium chlorate made July 180
 Soda less nitrate and iodine Dec. 176
 Textile mills more active Sept. 184
 Tire factory in production Jan. 170
 What the world expects from the United States. C. C. Concannon Feb. *123

China:

- Fuels from vegetable oils. Fa-Wu Cheng Jan. *99
 Industrial expansion (A) Dec. 234
 Mineral resources (A) Sept. 236
 What the world expects from the United States. Te-Pang Hou. Feb. 115
 Chloramine-B (A) Apr. 142

Chlorine:

- Caustic-chlorine cells in America (A) Feb. 228
 Chlorine cells in pulp mills (A) Feb. 232
 Chlorine comparator (E.N.) Sept. 127
 Current efficiency of Hooker type S cells (A) Mar. 204
 Flow control valve for chlorine gas. A. N. Thatcher (P.N.) Dec. *120
 German chlorines, a report on production methods. B. M. Hunter. Oct. *104
 How to choose, install and protect chlorination equipment. E. R. Woodward. Dec. 103
 Users wanted for caustic-chlorine surplus plants. R. S. McBride. Sept. *112
 Western producers of chlorine (table) Nov. 164
 Chromatography applied to explosives (A) May 236
 Chrome chemicals estimated June 86
 Chromium plating developments (A) Dec. 238
 Classifier, cross-flow. (E.N.) Apr. *126
 Cleaner, emulsion (A) Dec. 141
 Cleaning compound (A) July 140
 Clothing, safety (E.N.) May *139

Coatings:

- Butex, protective coating (A) July 140
 Coating resins (A) Nov. 144; (A) (tables) Dec. 144
 Corrosion-resistant coatings (A) Nov. 148; (A) Dec. 141
 Dip coating for cadmium and zinc (A) Oct. 146
 Flexible coating (A) Nov. 146
 Plastipeel, protective covering for metals (A) Nov. 144
 Porcelain enamels (A) Dec. 238
 Protective coating (A) Dec. 144
 Protective coating for aluminum alloys (A) Oct. 142
 Waterproof coating for plant records. C. B. Westerhoff (P.N.) Dec. 120
 Cobalt—extraction of pure cobalt by electrolysis (A) July 218

Coke and Coal Products:

- Coal and oil shale. J. M. Weiss. May 212
 Coal tar intermediates. J. M. Weiss. May 184
 Moisture test for coal and minerals. R. H. Schaller (P.N.) Nov. 116
 Production of coal-tar synthetic organic chemicals 1937-42 (table) Feb. 131
 Protecting coal piles from fires. Nov. 113
 Cold cream base (A) Aug. 144
 Colloids from kelp. C. K. Tseng. June *97
 Colombia—new fertilizer company formed Dec. 172
 What the world expects from the United States. Rene Grau. Feb. 124
 Column base repair in five story mill building. C. A. Lee (P.N.) Aug. *114
 Comparator, phosphate (E.N.) July *128
 Compressors for ammonia plant use instrument type speed control. Kenneth Ruhl Oct. *107
 Compressor, gas engine (E.N.) Nov. *131

- Concentration—Humphreys spiral concentrator; another tool for process industries Apr. *107
 Mineral concentrator (E.N.) Oct. *131
 Concrete—porous concrete (A) Jan. 236
 Connectors, cast (E.N.) June *126
 Conolon, airborne laminate (A) 138

Continuous Processing:

- Coal tar intermediates. J. M. Weiss. May 184
 Concentrated superphosphate manufacture. R. L. Copson May 218
 Continuous mixing and reaction equipment design. Brothman, Wollan & Feldman May *126
 Continuous processing report. May *101
 Control of material feed rate. D. M. Considine May 112
 Dry color manufacture. H. B. Kirkpatrick May 210
 Economic comparison of batch and continuous processing. R. M. Crawford May *106
 Edible oils. A. P. Lee May *190
 Explosives—batch versus continuous operation in the explosives industry. W. E. Berl May 202
 Fat splitting. O. H. Wurster. May 220
 Historical view of continuous process development. R. N. Shreve. May *103
 How batch unit processes are made continuous. M. G. Larian. May 114
 How continuity affects unit operations and processes May 110
 Pipeline digester for nitrocellulose. J. R. Yeager May 113
 Pitfalls in working out continuous processes. H. L. Bullock. May 116
 Problems in dissolving reaction and mixing. E. S. Bissell. May 112
 Pulp digestion. R. T. Sheen. May 204
 Rayon spinning. H. B. Kline. May 226
 Seagram distillery processes. H. F. Willie May *132
 Soap manufacture by the Clayton process. R. T. Sheen. May 214
 Synthetic resins can be put on continuous production basis. A. Brothman May 204
 Synthetic rubber. A. J. Gracia. May *184
 Tall oil from black liquor produced by batch and continuous processing. K. W. Coons May *196
 Technical aspects of continuous processes. Olsen & Lyons. May *118
 Wood hydrolysis by continuous processing. Raphael Katzen May *206

Controllers:

- Analysis determines control variables for distillation systems. C. W. Perry Oct. *108
 Combustibles recorder (E.N.) Dec. *131
 Concentration control (E.N.) Mar. *128
 Differential pressure controller solves extraction column problem. F. R. Ward (P.N.) Jan. *117
 Electric heat controller (E.N.) Jan. 129
 Electric level control (E.N.) Feb. *144
 Electronic controllers (E.N.) Feb. *145
 Float level controller (E.N.) May *134
 Instrument type speed control used on ammonia plant compressors. Kenneth Ruhl Oct. *107
 Potentiometer controller (E.N.) Sept. *127
 Slow rate flow controller of standard parts. T. R. Mack (P.N.) Sept. *123
 Uniform flow regulator for liquids. N. S. Serinis (P.N.) Jan. *117
 Vacuum gage control (E.N.) Mar. *128

Conveyors:

- Bulk conveyors (E.N.) Aug. *125
 Neoprene-Fiberglass conveyor (E.N.) Mar. *127
 Nomograph based on Caldwell equation gives conveyor power needs. Hooks & Kerze (P.N.) Sept. 122
 Portable conveyor (E.N.) Mar. 127
 Cooling towers—capacity control for atmospheric cooling towers. Ed. Ward Simons June *106
 Cooling unit (E.N.) Sept. 128
 Copolymer structure (A) Dec. 222
 Copra refining flowsheet Feb. *148

Corrosion:

- Corrosion forum. E. C. Fetter. Jan. 173, Feb. 187, Mar. 172, Apr. 171, May 171, June 166, July 187, Aug. 177, Sept. 209, Oct. 211, Nov. 231, Dec. 195
 Corrosion-resistant coatings (A) Nov. 148
 Corrosion test strip (A) Dec. 146
 Dunnflex protects metal parts (A) Mar. 142
 Kure beach test station. June 166
 Rust inhibitors (A) Sept. 146; (A) Sept. 152
 Corrosion, see also Coatings, Materials of construction
 Cotton—no restrictions on cotton planned for 1946 (N) Dec. 152

Couplings:

- Direct-connect (E.N.) Feb. *145
 Hose coupling (E.N.) Dec. 132
 Karbate (E.N.) Oct. *132
 Quick disconnect coupling (E.N.) Mar. *127

- Crane cab enclosed (E.N.) July *127
 Crotonic acid (A) Jan. 142
 Crystallizer, sugar (E.N.) Mar. *148

Cuba:

- Alcohol output increases May 168
 Production of laundry soap increases Sept. 184
 Sulphur dusting experiments Feb. 182
 Cyclohexyl levullinate (A) Jan. 140
 Cyclohexylamine (A) May 159

D**DDT:**

- Available for civilian use Aug. 96
 Combined with paint may solve barnacle problem (N) Aug. 158
 Effect of DDT on insects as determined at the University of Sao Paulo (table) Sept. 260
 Experiments reported by entomologists Sept. 166
 Oil soluble DDT (A) Dec. 141
 Damper, stack (E.N.) Aug. *128
 Dehydrobiotic acid (A) Jan. 238
 Deodorants (A) Nov. 146
 Depressant, four-point (A) Dec. 141
 Dermatitis from solvents can be prevented Nov. 107
 Detergents—soapless cleaner (A) Dec. 142
 Organic (A) Oct. 142
 Dibasic acid for resins (A) Feb. 165
 Dicyclohexylamine (A) May 150
 Dielectric heating applications (A) Sept. 248
 Diesels (E.N.) Sept. *125
 Diesel engines in oil well drilling (A) Aug. 220
 Diglycol carbonates (A) July 142
 Dilution—chart determines dilution displacement rates. A. W. Kingsbury (P.N.) Aug. *115
 Dipicrylamine as reagent for potassium (A) Oct. 269
 Directory of foreign purchasing agencies Feb. 111
 Dispersing agent (table) Dec. 142

Distillation:

- Analysis determines control variables for distillation systems. C. W. Perry Oct. *108
 Distillery processes for Cuban molasses (A) July 220
 Distillery processes. Seagram. H. F. Willie May *132
 Evaporation and distillation by thermocompression (A) Aug. 216
 Graphical solution of material balances. Luckenbill & Dierl. Sept. *123
 Molasses distillation flowsheet. May *142
 Using an orifice to assist control of low pressure steam flow. D. T. Othmer (P.N.) Apr. *122
 Door, observation (E.N.) Oct. 132
 Door, quick-opening (E.N.) Feb. 146
 Drums—drum up-ender (E.N.) July 137
 Drums to remain scarce Apr. 84
 Dry ice liquefier (E.N.) Dec. *130

Drying:

- Air recirculation in drying of unbound moisture. V. P. Victor (charts) July 165
 Flash drying and calcining developed from mill drying (A) Mar. 212
 How capacity of a drum dryer was doubled with a small additional investment. H. F. Reichard (P.N.) Dec. *118
 Infra-red dryer (E.N.) Feb. 146
 New pellet dryer for TCC catalyst offers diverse postwar uses. Payne & Lechthaler Dec. *105
 Spray dryer (E.N.) July *127
 Spray drying nozzle (E.N.) July *128

Dust and Fume Handling:

- Dust collector, tubular (E.N.) July 127
 Particle sizes in HC smoke screen (A) Sept. 250
 Wet dust collector (E.N.) May *138

Dyes:

- Fluorescent dye (A) Apr. 138
 Fluorescent flaw detector (A) Aug. 144
 German chemical industry Oct. 198
 Lightfast dye (A) Mar. 137

E

- Economic analysis of a new process aided by graphical method. M. M. Reynolds. Aug. *104
 Ecuador—limited market for plastics. May 166

Editorials:

- The alcohol lobby Nov. 115
 Ammonia for speed boats? July 115
 At taxpayers' expense Dec. 117
 Atomic bomb byproducts Oct. 125
 Back pay suits July 114
 Back to metal containers Jan. 113
 Bankers' jitters Jan. 112
 Basis for peace June 113
 Better college courses now Nov. 115

Bitter controversy looms.....Apr. 114	Engineers:	Metal spray booth.....Nov. *123
Blasting, open the future.....Aug. 112	Better college courses now (ed).....Nov. 115	Metallizing gun.....Oct. *130
Bureaucratic erudition.....Dec. 116	Engineering salesmanship and engi- neering training (A).....June 206	Meter for moisture.....Jan. *129
Can we control the future?.....Oct. 92	Engineers as professional men (A)..... Sept. 242	Meter, panel-mounted.....July *130
Can we have a "mild" inflation?.....Oct. 124	Personal aspects of professional de- velopment (A).....Sept. 252	Mineral concentrator.....Oct. *121
"Cancer can be cured".....Mar. 119	Engines—engine efficiency record (E.N.)..... Dec. 131	Mixing nozzle.....Feb. *144
Challenge of Christmas 1945.....Dec. 117	Interchangeable diesel (E.N.).....Apr. *125	Moisture meter.....Oct. *131
Chemical engineering looks at the world.....Feb. 91	Enzymes—commercial enzyme production (A).....Mar. 214	Molding press.....Aug. *126
Chemurgy or chaos.....Nov. 114	Equipment News:	Molding press, plastic.....July *128
The clock strikes twelve.....May 93	Aging bath.....Dec. *131	Monometer.....Oct. 130
A co-op is private industry.....May 137	Agitator, jet.....July *129	Motor bearing.....Aug. *126
The cost of money.....Sept. 121	Air cylinder.....June *127	Motor, diaphragm.....Aug. *127
Divided we fall.....June 112	Aluminum stool.....Sept. 128	Motor, explosion proof.....June *127
Education unlimited.....Jan. 96	Ash handling system, pneumatic..... Mar. *125	Motor, explosion-proof.....Apr. *127
Effective cooperation.....Dec. 117	Auger packer for powders.....Apr. *126	Motor, protected.....Apr. *125
"Even a wheel chair".....Apr. 114	Bag dumper.....Oct. *129	Motor, vertical.....Dec. *131
Export methods are different.....Jan. 113	Battery, explosion-proof.....Feb. 146	Multi-test cabinet.....Feb. *146
Facilities for workers.....Oct. 125	Bearing, bronze.....Sept. *127	Nozzle, combination.....Nov. *121
Facilities for the postwar.....Mar. 118	Bearings, carbon.....July *129	Nozzle, extinguisher.....Aug. *126
Fifteen cent nitrogen.....Jan. 112	Breathing apparatus.....Dec. *132	Observation door.....Oct. 132
For your information.....Feb. 92	Brush cleaner.....Dec. 132	Oven, conveyor type electric.....June *128
Four-way benefits of research.....Sept. 120	Bucket carrier.....Nov. *132	Oven, recirculating.....Oct. 130
Germany is still our problem.....June 92	Car puller.....June *127	Oven, self-contained.....Apr. 125
A good start.....Dec. 116	Centrifugal, continuous.....Oct. 132	Oxygen remover.....Apr. 127
Government employees' patents.....Jan. 112	Chlorine comparators.....Sept. 127	Penicillin dryer.....Oct. *130
Grants for research.....Oct. 125	Classifier, cross-flow.....Apr. *126	Pencil cleaning tool.....Oct. *127
Handle those empties!.....May 137	Cold cabinet.....Dec. *129	Pipe coupling.....Sept. *125
Hard and/or soft.....Mar. 118	Comparator, phosphate.....July *128	Pipe joint, plastic.....July *130
Honors to bomb makers.....Oct. 124	Compressor, gas-driven.....Nov. *131	Pipe line strainer.....Dec. *129
Increasing ability to see.....Dec. 116	Connectors, cast.....June *126	Pipe markers.....Oct. 132
Industry charts its postwar future Aug. 93	Controller, combustibles recorder..... Dec. *131	Pipe stress model.....Mar. *126
Industry-university payoff.....Sept. 121	Controller, concentration.....Mar. *128	Plastics tester.....Dec. *130
Integration of facilities.....Sept. 121	Controller, electric heat.....Jan. *128	Press, combination.....Nov. *132
Is nitrate exotic?.....May 137	Controller, float level.....May *128	Press, high-speed.....Mar. *127
Itiner, Martin Hill, 1870-1945.....May 137	Controller, potentiometer.....Sept. *127	Pressure detector.....Dec. 132
Keep an eye on Mexico.....Apr. 93	Controller, vacuum gage.....Mar. *126	Printer-developer.....June *126
Lend-lease stops.....Sept. 121	Conveyor, bulk.....Aug. *126	Proportioner.....Jan. 130
Let's fix those labels!.....July 115	Conveyor, neoprene-Fiberglas.....Mar. *127	Pulsation damper.....Oct. *129
Let's say "Flammable".....Apr. 114	Conveyor, portable.....Mar. 127	Pulverizer.....Apr. *125
Man energy vs. man power.....Mar. 93	Cooling unit.....Sept. *128	Pump, close-coupled.....Aug. *128
Momentous months, these.....Sept. 101	Couplings, direct-connect.....Feb. *145	Pump, dry air.....June *127
Must death begin at 40?.....July 115	Coupling, hose.....Dec. 132	Pump, duplex pressure.....Sept. *128
New design factors.....June 112	Couplings, Karbate.....Oct. *132	Pump, gathering.....May 129
New responsibilities.....Jan. 112	Coupling, quick disconnect.....Mar. *127	Pump, heavy duty positive.....Mar. *126
New salary freedom.....Aug. 113	Crane cab enclosed.....July *127	Pump, hydraulic.....Dec. *129
No natural foods left?.....Mar. 119	Crystallizer, sugar.....Mar. *125	Pump, mechanical vacuum.....May *128
One nation economically.....June 112	Damper, stack.....Aug. *128	Pump, premure rotary.....Dec. *130
Opportunity vs. isolation.....Nov. 114	Diesel, interchangeable.....Apr. *125	Pump, rotary.....Jan. *130
Our constitutional right?.....Mar. 119	Diesel series.....Sept. *126	Pump, slurry.....Aug. *128
Pacific process industries.....July 114	Door, quick-opening.....Feb. 146	Pump, water jet.....Dec. *129
A pat and a patent.....Apr. 114	Drum up-ender.....July *127	Pump, water supply.....July *129
Patents for public use.....Nov. 114	Dry ice liquefier.....July *127	Pyrometer, portable.....June *127
A personnel bungle.....Apr. 115	Drying nozzle.....July *129	Pyrometer, radiation.....May *129
Pipeline warfare.....Nov. 115	Dust collector, tubular.....July *127	Recorder, high-speed.....Sept. *127
Planning a safety code.....June 112	Dust collector, wet.....May *133	Rectifier, multi-range.....Feb. *145
President Truman.....May 136	Electric speed indicator.....May 133	Rectifier, selenium.....Dec. *131
Prevention of dumping.....Jan. 113	Electrode, cutting.....Dec. 132	Relay, hydraulic.....Jan. *127
A proper specification.....Mar. 118	Electrode, high tensile.....Dec. 130	Respirator, vapor.....Sept. *128
Quick decisions, pro and con.....Oct. 124	Electronic controllers.....Feb. 145	Roof coating.....Sept. 128
Rebuilding our most basic reserves..... Dec. 92	Electronic galvanometer.....Nov. *132	Rotameter, armored.....Nov. *133
Research education.....May 136	Electronic level control.....Feb. *144	Rotameter, illuminated.....Oct. *131
Research officially recognized.....Aug. 112	Electronic mist collector.....Aug. *127	Rotameter tube.....July *129
Revitalizing commerce.....Oct. 124	Electronic thermometer.....Feb. *144	Safety clothing.....May *139
Rubber economics.....Mar. 118	Electrostatic spraying.....May 139	Seal, rotating.....July *130
Salvage those engineers!.....Dec. 116	Engine efficiency record.....Dec. 131	Searchlight, portable.....Feb. *146
Science, politics and humanity.....Nov. 95	Fan, axial-flow.....Aug. 125	Separators, magnetic.....Aug. 127
A selling job for all of us.....Feb. 92	Feeder, reagent.....Oct. *131	Separators, magnetic powder.....Aug. *128
Single hardness scale?.....July 114	Filter, self-cleaning.....Sept. 126	Separator, spout magnet.....Nov. 131
Sins of consultants.....Aug. 112	Fire extinguishers.....June 126	Shaft seal.....Nov. *131
Swim for yourself.....Aug. 112	Fire extinguisher, carbon dioxide..... Jan. *127	Shear, specimen.....Nov. *132
Take care in labeling.....Jan. 113	Fire extinguisher, foam.....Oct. *132	Shave, V-belt.....Oct. *130
Taxation and new product develop- ment.....July 95	Foot protector.....Mar. *126	Silica block.....Aug. 125
Technical spokesman abroad.....Jan. 112	Gage, electronic.....Dec. 129	Slide rule.....Apr. 126
Technologists needed.....Jan. 120	Gage, gamma ray.....Sept. *125	Sling, Level-Lift.....June *126
Three uses of color.....June 112	Gage, high-vacuum.....Feb. 146	Smoke detector.....Sept. *126
Tin, the bottleneck.....Aug. 112	Gage, high vacuum recorder.....Aug. *128	Spectrophotometer, infrared.....Mar. *125
Two groups with one job.....July 114	Gage, ionization.....Aug. *125	Starter, reversing.....Sept. *127
Ueber alles?.....July 115	Gage, metal ionization.....Oct. *131	Steam condenser.....Feb. *145
Uniform standards in Americas.....Apr. 115	Gage, portable vacuum.....Sept. *127	Steam trap.....June *126
Waiting for Santa Claus.....Dec. 117	Gage tester.....Aug. *126	Stoker, spreader type.....July *130
Want to share in \$2 billion?.....Apr. 114	Gas analyzer.....Aug. 125	Stool, steel.....Dec. 130
Welcome news.....Sept. 120	Generator, 15 kw.....Aug. *127	Suction device for container cleaning..... June *126
What cost management?.....June 113	Goggle cleaner.....Sept. *128	Switch, snap-action.....Jan. 130
What is patentable?.....Apr. 115	Goggle, fog free.....Mar. *126	Switch, time.....Nov. *132
Whose job is it?.....June 113	Goggles, safety.....Mar. *128	Tachometer, hand.....June *128
Eductor or aspirator made from rubber or other non-metallics. J. A. May Nov. *116	Grinder, attrition.....Apr. *126	Tachometer, hand.....May *139
Eire—DDT plant capacity to increase..... Dec. 176	Grinding mill.....June *125	Tank enlargement.....July *128
Development of solvents.....Feb. 134	Grinding mill.....Apr. *127	Temperature anticipator.....June 125
Electric conductor of rubber (A).....Nov. *144	Hard overlay-rod.....Dec. 132	Test cabinet.....Dec. *131
Electric speed indicator (E.N.).....May *138	Heat exchanger.....Jan. *137	Test fire.....July *127
Electrochemical industries. R. B. Wit- tenberg.....Mar. *103	Heat recovery silencer.....Mar. *139	Thermostatic trap.....May 138
Trends in wartime (A).....Feb. 214	Heater, electronic.....July *123	Timer, control.....June 126
Electrochemical Society meeting (N)..... May 155	Heater, direct fired.....Nov. *133	Timer, industrial.....Mar. *125
Electrodes—cutting electrode (E.N.).....Dec. 132	Heating unit, serpentine.....Jan. *129	Trigger control.....Sept. *126
High tensile electrode (E.N.).....Dec. 130	High-vacuum system, unit.....June *125	Truck, floor.....Nov. *131
Electrolytic cell room hazards (A).....Jan. 206	Hoist, load-conforming.....Oct. 132	Truck, lift.....Jan. *127
Electromagnetism—thermal diffusion as adjunct of electromagnetic process. M. C. Fox.....Dec. *102	Homogenizer.....Oct. 129	Vacuum filler.....Dec. *132
Electronics:	Hood for acid workers.....June *128	Vacuum recorder.....Feb. *144
Galvanometer, electronic (E.N.).....Nov. *132	Hose, metal, flange.....May *139	Valve, air operated.....Nov. 132
Industrial electronics (A).....Apr. 210	Hose, stainless.....Nov. *132	Valve, bar stock.....Dec. *130
Methods that offer new tools for pro- cess control—report.....July *119	Infrared dryer.....Feb. 146	Valve, cast steel.....Sept. 126
Survey uncovers potential uses for electronic devices (charts & table) June 110	Insulation gun.....Mar. *127	Valve, check.....Oct. *130
Electroplating. J. A. Lee.....May 194	Intimate blender.....Feb. *145	Valve, diaphragm.....Jan. *129
Pre-plating dip for metals (A).....Mar. 140	Joint, adjustable.....Jan. 130	Valve, steel gate.....Jan. *130
Electrostatic spraying (E.N.).....May 139	Kiln shield.....Jan. 129	Voltage regulator.....Apr. *128
Enamels, porcelain (A).....Dec. 242	Labeler.....Oct. 129	Vulcanization, electronic.....Apr. *128
Enamel, synthetic (A).....Oct. 142	Loader, box car.....Mar. *126	Water analyzer.....Nov. *132
	Loader, lift gate.....Mar. *126	Water heater.....Aug. *126
	Magnet separator.....Apr. *127	Water de-ionizer.....Aug. *126
	Magnetic concentrator.....Jan. 128	Water heater.....Feb. 146
	Mercury vapor detector.....Mar. *128	Water still, protected.....Sept. *126
		Water treater.....Mar. *126
		Water unit.....Sept. *128
		Welding aid.....Aug. *127
		Welding process.....Apr. *128
		Wind-up machine.....Dec. 131
		Wood, impregnated.....Dec. 130
		X-ray spectrometer.....Jan. *128
		Ethanolpyridine (A).....Nov. 144

- Ethocel container (A).....Nov. *144
Ethyl alcohol made from refinery ethylene
Nov. *96
Ethyl α -oxalpropionate (A).....Feb. 152
Ethyl chloride from waste material.....Apr. 194
Ethylene-petroleum byproducts—a big
factor in organic chemical industry
—report.....Dec. *131
Europe—technical investigators who visited
European countries on TIFC
missions (N).....Nov. 151
Evaporation and distillation by thermo-
compression (A).....Aug. 216
- Explosives:**
Batch versus continuous operation in
the explosives industry. W. E. Berli
May 202
Chromatography applied to explosives
(A).....May 236
Ethyl cellulose plant development,
Hopewell, Va. shows integration of
facilities—report.....Sept. *129
Procurement of raw materials for
high explosives. P. G. Slachman.....
Oct. *112
Smokeless powder and high explosives
plants which are surplus property
(table).....Oct. 93
Story behind newspaper stories of
rockets.....Jan. *96
Union made explosives asked.....Apr. 82
- Exports:**
Americans can sell their share of
chemical engineering despite higher
costs. A. P. Lee.....Feb. *105
Complete chemical plants—f.o.b. Amer-
ica delivered anywhere in the world
Feb. 106
Five-point platform for foreign trade
Feb. 101
International chemical engineering.....
Feb. *102-111
Pitfalls can be avoided in exporting
chemical engineering knowledge. F.
G. Breyer.....Feb. *103
Problems that must be met in develop-
ing chemical industries in foreign
lands. C. O. Brown.....Feb. *107
What the world expects from the
United States.....Feb. *112-126
World markets for American chemi-
cals. T. M. Swits (maps).....Feb. *99
World markets for American chemi-
cals and related products (map).....
Feb. 86
World markets for industrial prod-
ucts based on relative industrializa-
tion (map).....Feb. 93
Exposition of Chemical Industries (N).....
Dec. 149
Extraction—differential pressure controller
solves extraction column problem.
F. R. Ward (P.N.).....Jan. *117
- F**
Fans, axial-flow (E.N.).....Aug. *125
Feed rate of raw material as a contin-
uous flow. D. M. Conditine.....May 112
Feeder for activated carbon. Edward
Engstrom (P.N.).....Nov. *118
Feeder, reagent (E.N.).....Oct. *121
Ferromanganese, low-carbon (A).....Dec. 144
- Fertilizers:**
Air conditioned room for exposure
tests of fertilizer. J. A. Chenavey
(P.N.).....Aug. *115
American Plant Food Council formed
(N).....Aug. 152
Commercial fertilizers and agricul-
tural minerals used in California
(table).....Dec. 164
Hill-Bankhead bill.....May 80
Production of fertilizers and materials
in 1944.....Feb. 134
Soluble glass may offer fertilizer pos-
sibilities. Badger & Bray.....Apr. *112
- Fiberglass:**
Bandage of fiberglass (A).....Nov. 143
Fusel oil decanter packed with fiber-
glass (P.N.).....Sept. *124
Mat of fiberglass (A).....June 123
Packing for catalyst (P.N.).....July 217
Rubber fiberglass (A).....Jan. 146
Pit Islands—coconut oil production.....Mar. 179
Film developer (A).....Nov. 142
Film, removable protective (A).....Nov. 146
Filtration—effect of filtration on quality
of filtrate (A).....Oct. 264
Self-cleaning filter (E.N.).....Sept. 126
Finland—rayon plants increase outputs.....
Apr. 164
Fire extinguisher (E.N.).....Jan. *127
June 126; Oct. 146
Fire extinguisher, foam (E.N.).....Oct. *132
Fire retarding coating (A).....Sept. 150
Fire test (E.N.).....July *127
Flameproof (A).....June 133
Flavoring material (A).....Mar. 144
Flax—unretted flax and hemp as a textile
fiber in Germany.....Dec. 186
Floor cleanser (A) Aug. 137; (A).....Sept. 154
- Flowsheets:**
Acid-grade fluorspar.....Aug. *130
Alcohol from petroleum flowsheet.....
Nov. *136
- Alsinic acid and algin flowsheet. June 98
Alumina produced from northwest
clay. J. R. Callahan.....Dec. *108
Anhydrous hydrogen fluoride produc-
tion.....Mar. 95
Bayer process and sinter process for
red mud treatment of alumina re-
covery.....Jan. *106
Caustic evaporation in Basic Mag-
nesium plant, Las Vegas, Nev.....Sept. 113
Cellulose acetate yarn.....Jan. *132
Copro refining.....Feb. *145
Ethyl cellulose operations.....Sept. *133
Explosives flow diagram.....Oct. 114
Fluorine chemicals flow chart, Penn
Salt Mfg.Mar. 97
Furfural production.....July *132
Glycerine plant for production by high
vacuum. G. J. Stockman.....Apr. *100
Liquid-phase pentane isomerization at
Tide Water Associated Oil Co.Sept. 110
Magnesium metal and calcium hypo-
chlorite.....Apr. *130
Molasses distillation.....May *142
Recovery of alcohol and tartrates
from waste pomace.....Oct. 103
Recovery of grain alcohol byproducts
June *130
Recovery of tartrates from winery
wastes.....Sept. 118
Searles Lake chemicals.....Oct. *124
Synthetic ammonia flowsheet.....Dec. *134
Varnish and paint.....Mar. *130
Fluid catalysts make their debut in
chemical production. J. A. Lee.....
July *100
Fluorescent flaw detector (A).....Aug. 144
Fluorescent textile (A).....Apr. 138
Fluorides, propene (A).....Jan. 142
Fluorine—new liquid incendiary agent in
Germany.....Dec. 184
A postwar career molded from war-
time service. J. R. Callahan.....Mar. *94
Fluorspar—acid-grade fluorspar flow sheet
Aug. *130
Specifications, uses and concentration
of fluorspar. H. G. Hymer (tables)
Aug. *88
Foot protector (E.N.).....Mar. *126
Forming-pad, rubber (A).....July *139
Foundry sand characteristics (A).....Oct. 266
- France:**
Glass industry to increase.....May 165
Shortage of coal and other raw ma-
terials slows recovery of industries
Dec. 174
What the world expects from the
United States.....Feb. 124
Freight charges—basing point ban.....May 82
French Morocco—phosphate industry more
active.....Aug. 174
Phosphate production declines.....Oct. 185
- Fuel:**
Fuel tablets to heat rations (A).....Jan. 140
Motor fuels from coals (A).....June 80
Non-flammable aviation fuel (A).....
Aug. *127
Pipeline warfare (ed).....Nov. 115
Fungicide (A).....Dec. 146
Fungicide for seed (A).....Jan. 230
Furfural production flowsheet.....July *132
- G**
Gages:
Electronic gage (E.N.).....Dec. 129
Gage tester (E.N.).....Aug. 126
Gamma ray gage (E.N.).....Sept. *125
High-vacuum gage (E.N.).....Feb. 146
High vacuum measurement with the
McLeod gage. E. W. Flisodorf.....
Nov. *102
High vacuum recording gage (E.N.).....
Aug. 128
Ionization gage (E.N.).....Aug. *125
Metal ionization gage (E.N.).....Oct. *121
Portable vacuum gage (E.N.).....Sept. *127
Galvanising finish (A).....July 140
Gamma valerolactone (A).....Feb. 160
- Gas:**
Chart for gas velocities with a pitot
tube. L. I. Mitchell (P.N.).....June *114
Dial chart makes gas flow indicators
direct reading for fixed temperature.
Melvin Nord (P.N.).....Feb. *142
Gas analyzer (E.N.).....Aug. 125
Gas diffusion—Oak Ridge gives indus-
try a unit operation. J. F. Hogerton
Dec. *93
Gaseous mixtures for chemical syn-
theses (A).....Jan. 234
Liquefied petroleum gas grows (N).....
Dec. 82
Orifice design computations for gases
simplified. A. E. Kroil (P.N.).....
Apr. *124
Predicting viscosity of gases at high
pressure. Comings & Mayland
(chart).....Mar. *115
Surface area measurements of porous
materials (A).....Mar. 210
- Gasoline:**
Aviation gasoline from coal.....Dec. 178
Petroleum processing makes gains of
widespread significance—report.....
June *117
- Isopentane produced by liquid-phase
isomerization. L. S. Galstaun.....Sept. *109
100 octane and better (A).....Mar. 200
Petroleum byproducts—a big factor
in organic chemical industry—report
Dec. *121
Surplus aviation gasoline and related
plants (table).....Oct. 98
Gelatin stock checked for shrinkage in
shipments.....May 86
Generator, 15 kw (E.N.).....Aug. *127
- Germany:**
Acetylene chemicals synthesized.....Oct. 200
Acetylene industry in wartime Ger-
many. R. L. Hasche.....Oct. *116
American technical men investigate
Germany's industrial war develop-
ments.....Aug. 147
Chemical industry.....Sept. 115, Oct. 192
Nov. 188, Dec. 178
Chlorine production report. R. M.
Hunter.....Oct. *104
Engineering group formulates pro-
gram for control of industry (N).....
Oct. 151
German propaganda, post-surrender
edition. S. D. Kirkpatrick.....July *102
Substitute for mica insulation.....Oct. 204
Technical secrets from Germany (A)
Oct. 242
Through Germany in a jeep. S. D.
Kirkpatrick.....June *94
Gilder, wood, repair. C. A. Lee (P.N.).....
Dec. *119
Glass—hydrofluoric acid resistant glass
(A).....Jan. 139
Soluble glass may offer fertilizer pos-
sibilities. Badger & Bray.....Apr. *112
- Glue:**
Glue from plywood (A).....Apr. 137
Mold-proof glue for pallet-loading (A)
Mar. 138
Synthetic glue in Germany.....Dec. 178
Wood bonding glue (A).....Feb. 155
Glutamates to be produced by California
plant (N).....Aug. 159
Glycerine—consumption, shipments and
allocation 1940-44 (table).....Feb. 133
Recovery in distillation greatly im-
proved by high vacuum. G. J.
Stockman.....Apr. *190
- Goggles:**
Fog free goggles (E.N.).....Mar. *126
Goggle cleaner (E.N.).....Sept. *128
Safety goggle (E.N.).....Mar. *128
Graphical method shows the relations be-
tween costs and profits in production
of industrial products. M. M. Rey-
nolds.....Aug. *104
Greasewood tested as source of resins (A)
Oct. 176
- Great Britain:**
After V-E and V-J (A).....Mar. 193
Chemical controls may be terminated
Feb. 170
Chemical manufacturers cooperate to
promote postwar developments.....Jan. 162
Chemical manufacturers study prob-
lems of reconverting war plants.....
June 156
Cooperative planning replaces war-
time controls in chemical industry.....
Sept. 178
Essential civilian needs provide new
priorities for chemical industry.....
July 166
Export and import controls over chemi-
cals relaxed.....Nov. 176
Improvement in shipping and sudden
termination of lend-lease affect
foreign trade.....Oct. 182
Movement for relaxation of govern-
ment controls gains momentum.....
May 162
Plastics and synthetic fibers have
prominent place in war planning.....
Mar. 162
Reconversion progress is rapid but
many wartime controls are contin-
ued.....Dec. 170
Wartime production experience will
influence design of postwar chemical
plants.....Apr. 158
Progressive de-control marks transi-
tory stage of British chemical in-
dustry.....Aug. 166
Whaling ship launched.....Sept. 156
Greece—rosin production drops.....Dec. 174
Grinder, attrition (E.N.).....Apr. *126
Grinding mill (E.N.).....Apr. *127; June *125
Gum benzoin (A).....Sept. 150
- H**
Hard overlay-rod (E.N.).....Dec. 122
- Heat:**
Boosting temperature with gas burn-
ers. George Tauth (P.N.).....July *118
Heater, direct fired (E.N.).....Nov. *133
Heater, electronic (E.N.).....July *128
Serpentine heating unit (E.N.).....Jan. *129

Heat Exchange:

- Chart for contraction and enlargement losses. Monet & Ward (P.N.) Oct. *128
Heat exchanger (E.N.) Jan. 127
Solving the heat exchange problem cooling hot hydrochloric acid. Alfred Lippman, Jr. Mar. *112
Heat recovery silencer (E.N.) May *129
Heat transfer—heat transfer coefficients for pipe and wire. Hooks & Kerse, Jr. (P.N.) Nov. *117
New basis developed for comparing heat transfer fluids. Parsons & Gaffney Jan. *100
Hot, load-conforming (E.N.) Oct. 122
Homogenizer, impact (E.N.) Oct. *129
Hood for acid worker (E.N.) June *128
Hormone weed killer (A.) Nov. 174

Hose:

- Durable rubber (A.) Sept. 150
Metal, flange (E.N.) May *139
Stainless (E.N.) Nov. *132

Hydraulics:

- Determining flow from open end pipes (P.N.) R. L. Miller July *117
Determining pump discharge by height of stream from vertical open end pipe. F. C. Bennett (P.N.) Oct. *126
Graphical solution of friction loss problems in fluid flow. A. E. Kroll Mar. *110
Stream flow estimation by salt concentration. P. C. Ziemke (P.N.) July *118
Hydrocarbons—method of drying wet hydrocarbons. W. H. Tell (P.N.) June *115
Hydrochloric acid—solving the heat exchange problem in cooling hot hydrochloric acid. Alfred Lippman, Jr. Mar. *112
Hydro-electric power for Missouri Valley May 82
Hydrogen—wartime chemical developments in German industry Sept. *115
Hydrogen, canned (A.) Nov. 144
Hydrogen peroxide (A.) Nov. 143
Hydroxybiphenyl germicides (A.) Mar. 216

I

- Index to Chemical & Metallurgical Engineering Pictured Flowcharts 1939-1945 Dec. 153
Index to Chemical & Metallurgical Engineering Reports 1926-1945 Dec. 156
Index of industrial and scientific reports of Army and Navy released Nov. 220

India:

- Four magnesium chloride plants Sept. 186
New chemical production planned Oct. 182
New uses for shellac Mar. 170
Oilseed output declines Jan. 162
Plastic association formed Dec. 176
Potassium permanganate produced Apr. 168
What the world expects from the United States. Vaman Ramchandra Kokatur Feb. 113
Industrial products—costs and profits. M. Reynolds Aug. *104

Infra-red:

- Drying by infra-red radiation (A.) Nov. 230
Infra-red unit (E.N.) Oct. 131
Methods that offer new tools for process control—report July *119
Ink—printing ink, paint and varnish not made by continuous processing. E. S. Valentine May 224
Insect repellents placed under allocation (N) June 86

Insecticides:

- DDT—entomologists' opinions (A) Feb. 212
DDT toxicity (A.) Feb. 226; (A) Mar. 190
Gammexane (A) July 144
German chemical industry Oct. 194
Insecticide carrier (A.) Dec. 148
Insecticide dust bombs to be produced in Oregon (N) Sept. 172
Instrument Society of America formed (N) May 158

Insulation:

- Ceramic capacitor dielectric (A.) Mar. 187
Flame-resistant laminates (A.) July *139
German substitute for mica insulation Oct. 204
Insulation gun (E.N.) Mar. *127
Liquid insulation (A.) May 150
Silicones for electrical insulation Mar. 206
Silicones for insulating electrical machines (A) Feb. 216
Thermal insulation from Perlite rock (A) July 140
Waterproof insulation (A.) Feb. 156
Insulator, thermoplastic (A.) June 137
Inventory controls restricted Sept. 89

- Iran—borax production in Iran June 164
What the world expects from the United States Feb. 126

J

- Java—natural rubber stocks Nov. 146
Job evaluation during and after reconversion (A) Aug. 204
Joint, adjustable (E.N.) Jan. *120

K

- Kaiser forms syndicate to negotiate for steel (N) Aug. 158
Kansas City technical men organize council (N) Aug. 150
Kilns:
Kiln shield (E.N.) Jan. *129
New formula developed for rotary kiln time. R. A. Bayard Mar. *100
Rotary lime kiln operation (A) Apr. 204

L

- Labeler (E.N.) Oct. *129
Labels, gummed (A) Oct. 148

Labor:

- Expected postwar employment of West Coast manufacturers (table) Aug. 164
Job evaluation during and after reconversion (A) Aug. 204
Personnel problems (A) Apr. 208
Recognize veterans for what they're worth. E. W. Fair Nov. 105
What is ahead in labor relations. V. T. Boughton Apr. 120
What is ahead in manpower and labor relations—reports (charts) Apr. *116

Lacquer:

- Aircraft lacquer (A) Nov. 146
Air-foil lacquer (A) May 149
Recent developments enhance future of lacquer industry. J. R. Yeager Apr. *110
Laminate, airborne (A) Aug. 138
Flame-resistant (A) July *139
Latin America—directory of foreign purchasing agencies Feb. 111
Latin America looks to the United States Feb. 111
Lead—refining by chlorination (A) July 226
WFB restricts lead chemicals May 86
Leather—wartime chemical developments in German industry Sept. *115
Lens cleaner (A) Sept. 152
Lime—price regulations Sept. 88
Linseed varnish oil (A) Aug. 157
Liquid-vapor equilibria shown by chart. Melvin Nord (P.N.) Sept. *134
Lithium—aluminum-silicon alloys (A) July 224
Loader, box car (E.N.) Mar. *128
Lift gate (E.N.) Mar. *126
Logarithmic means calculated. D. S. Davis (P.N.) Apr. 123
Loose-leaf binder fabric (A) June 142

Lubrication:

- Chain conveyor lubricant (A) Oct. 144
Corrosion preventive lubricants (A) June 137
Engine lubricant (A) Aug. 137
Footproof lubrication for plant machines. P. de Chazal (P.N.) Apr. 123
Lubricating grease (A) Aug. 128
Steam turbine lubrication (A) Feb. 234

M**Magnesium:**

- Diamond magnesium plant makes magnesium chloride from dolomite—flowchart Apr. *130
Disposal of government-owned magnesium plants May 132
Future of magnesium in the West (A) Nov. 262
New magnesium casting process developed by University of California (N) Sept. 174
Postwar magnesium need Apr. 80
Production of magnesium by the electrolytic process. Avery & Evans Apr. *94
Sodium metal produced from magnesium plant (N) Sept. 168
Surplus alumina, aluminum and magnesium plants (table) Oct. 99
Magnetic concentrator (E.N.) Jan. 128
Manganese—Brazilian manganese (A) Apr. 128
Maps—wet-strength papers for modern war maps. C. G. Weber Mar. 109
Masking tape (A) Apr. 144
Material distribution between two streams. Luckenbill & Dierl Sept. *123

Materials Handling:

- Army develops mechanical shell loading Apr. *99
Bulk material storing efficiently handled by modern equipment. W. G. Hudson Jan. *108
Handling materials with lifting, tiering and special trucks—report Nov. 119
Material handling society formed in Pittsburgh (N) Dec. 150
Materials of construction—how to choose, install and protect chlorination equipment. E. R. Woodward Dec. 103
Manufacture of potassium metabisulfite. Wheaton & Sunderlin Nov. *231
McGraw-Hill to publish Science Illustrated (N) Dec. 152
Menthylphenol (A) Sept. 146
Mercury cathode type of alkali and chlorine cell. W. C. Gardiner July *110
Mercury dry cell May 80
Mercury vapor detector (E.N.) Mar. *128
Merry-go-round device equipped with hoists used to treat steel pressure tanks (P.N.) Aug. *116

Metals:

- Metal cleaner (A) June 138
Metal spray booth (E.N.) Nov. *123
Metals for service at subzero temperatures. P. B. Petty June *102
Rare metals prospects (A) Sept. 234
Metaldehyde tablets as fuel (A) Jan. 140
Metallizing gun (E.N.) Oct. *130
Metallurgy—pilot plant for study of unit operations (picture feature) Nov. 108

Meters:

- How to choose, install and protect chlorination equipment. E. R. Woodward Dec. 103
Manometer (E.N.) Oct. 130
Moisture meter (E.N.) Jan. *129; Oct. *131
Panel-mounted meter (E.N.) July *130
Photometers—methods that offer new tools for process control—report July 119
Relative viscosity measurements made with constant flow viscometer. N. S. Serinis (P.N.) May *140
Rotameter, illuminated (E.N.) Oct. *131
Rotameter tube (E.N.) July *129
Slide rule conversion for manometer readings. M. E. Klecka (P.N.) Oct. 137
Methane—petroleum byproducts—a big factor in organic chemical industry—report Dec. *121
Methanol-water solutions solved by nomograph. W. C. Frishe (P.N.) Nov. *118

Mexico:

- Calcium arsenate plant built May 166
Concessions granted for phosphate mining Apr. 166
Exports of naval stores reduced Aug. 175
Flat glass manufactured Jan. 170
Market for sulphuric acid Oct. 190
New caustic soda plant Dec. 176
New chemical production July 180
Tanneries on full-time basis Aug. 174
What the world expects from the United States. F. W. Jensen Feb. *114
Microanalysis, organic (A) Feb. 238
Microscope—methods that offer new tools for process control report July 119
Minerals—California mineral output in 1944 (table) Dec. 166
Minerals Market Survey formed (N) Dec. 166

Mixing:

- Continuous mixing and reaction equipment design. Brothman, Wollan & Feldman May *124
How continuity affects unit operations and processes May 110
Mixing nozzle (E.N.) Feb. *144
New analysis provides formula to solve mixing problems. Brothman, Wollan & Feldman Apr. *103
Moisture determination in solid materials. A. O. Gates (P.N.) Dec. 119
Moistureproof packaging material (A) Aug. 140

Molasses:

- Alcohol from molasses. R. D. Toussley Oct. 121
Distillation flowchart May *140
Distillery processes for Cuban molasses (A) July 220
Mold spray for foundry use (A) Feb. 160
Molding powder, keratin-phenolic (A) July 146
Molding press (E.N.) July *128; (E.N.) Aug. 126
Mol-weight fraction conversion chart. Melvin Nord (P.N.) Aug. *116
Morocco—French Morocco may manufacture dry ice Feb. 184

Motors:

- Diaphragm motors (E.N.) Aug. *127
Explosion-proof motor (E.N.) Apr. *127; (E.N.) June 127
Protected motor (E.N.) Apr. *126
Vertical motor (E.N.) Dec. *131
Motor oil additive (A) June 138

Munitions:

- Army develops mechanical shell loadingApr. *99
Loaded ammunition inspected by x-raysMar. *102
Story behind newspaper stories of rocketsJan. *96

N

- Naphthenates further restrictedMay 86
Naphthenates, metallic (A)July 140
Naphthenic acid available for civiliansAug. 86
National Research Foundation (e)Dec. 93
National Research Foundation—policy battles back of the proposed research foundation. R. S. McBrideNov. 99

Natural Gas:

- Chemicals from natural gas at Texas plant of CelaneseAug. *97
Petroleum byproducts—a big factor in organic chemical industry—reportDec. *121
Production of natural gas in 1944 in California (N)Aug. 160
Synthetic ammonia produced from natural gas. J. A. LeeDec. *94
Netherlands—chemical industry looks to postwar. G. BosschierMay 98
What the world expects from the United States. Roseboom & BosschierFeb. *118
Nicaragua—produces more vegetable oilsApr. 163
Nickel cyanide compounds (A)Sept. 253
Nickel ribbon and foil 0.1 micron thick (A)Dec. 248
Nitrogen—natural vs. synthetic nitrate. J. A. Woods (e)July 182
Shortage is sure (N)Dec. 84
Nitrocellulose digested in water. J. R. YeagerMay 113
Northwest—utilization of forest-products waste in the Northwest (A)Jan. 220
Western trends (A)Jan. 220
Norway—nitrate of lime plants resumeOct. 190
Nozzle, combination (E.N.)Nov. 131
Nozzle, extinguisher (E.N.)Aug. *126

Nylon:

- Nylon rods (A)Nov. 146
Nylon polyamides, their chemical and industrial development. H. H. IrvinMay *94
Synthetic fibers set the formula for a textile revolution—reportJan. *119

O

Oils and Fats:

- Animal oil limitedMay 86
China produces fuels from vegetable oils. Fa-Wu ChengJan. *99
Determination of freezing point of oil (A)Mar. 214
Drying oil from soybeans (A)Apr. 137
Edible oils by continuous refining. A. P. LeeMay *130
Fat industry (A)Feb. 228
Fat splitting. O. H. WursterMay 320
Synthetic fatty acids in GermanyDec. 182
Tall oil from black liquor produced by batch and continuous processing. K. W. CoonsMay *136
Tung and peanut oils produced in new Madagascar plant. D. GordonNov. *106
Vegetable oils and fats production 1940-44 (chart & table)Feb. 128
Viscosity stabilizer for oil at extreme temperatures (A)Mar. 144
Oil well sealing (A)May 152
Ointment for burns (A)Jan. 140
Oleum plants which are surplus property (table)Oct. 98
Optical plastics developed in wartimeNov. 113

Organic Chemicals:

- Production of synthetic organic chemicals (tables) 1943-44-45Jan. 262;
Mar. 244; Apr. 244; May 254; June 242; July 250; Aug. 244; Sept. 294;
Oct. 295; Nov. 310
Synthetic organic chemicals consumption and stocks 11 months 1944 (table)Feb. 142
Synthetic organic chemicals production 1939-43 (tables)Feb. 130
Organic solvents (A)Nov. 146
Organosilicon chemistry (A)Sept. 346

Ovens:

- Conveyor electric (E.N.)June 128
Recirculating (E.N.)Oct. *130
Self-contained (E.N.)Apr. 125
Oxygen remover (E.N.)Apr. 127

P

- Pacific Northwest chemical industries (A)Dec. 246
Pacific process industries. J. R. CallahanAug. *156, Sept. *166, Oct. *166, Nov. *164, Dec. *162
Pacific Research Foundation organized (N) Oct. 174, (N)Dec. 166
Packing of Fiberglas for catalyst (P.N.)July *117

Paints:

- Antirust paints (A)June 212
Bactericidal paints (A)Aug. 214
Chemical color plant for Bay region (A)Nov. 174
Chrome pigments reducedMay 86
DDT in paint may solve problem in barnacles (N)Aug. 153
Dry color manufacture. H. B. KirkpatrickMay 210
Micaceous paint pigment (A)Aug. 142
Orange pigment (A)Oct. 146
Postwar paints (A)Feb. 228
Printing ink, paint and varnish not made by continuous processing. K. S. ValentineMay 224
Spray booth compounds (A)Apr. 142
Tire paint (A)Sept. 152
Varnish and paint flowsheetMar. *130
Palestine—chemical outputJan. 170

Paraffin:

- Chlorinated paraffins (A)Mar. 137
Paraffin isomerization (A)Nov. 280
Paraffin wax placed under controlJuly 83

Patents:

- Patents for public use (ed)Nov. 114
Protecting research profits (A)Mar. 192
Public service patents (ed)Dec. 116
Seized alien patents have been summarized (N)Apr. 147
Seized patents deposited with Research Institute (N)Aug. 154
Peanuts—research project aimed to expand use of peanuts (N)Aug. 150
Tung and peanut oils produced in new Madagascar plant. D. GordonNov. *106
Penicillin dryer (E.N.)Oct. 130
Penicillin tablets (A)Oct. *142
Pentane—petroleum byproducts—a new factor in organic chemical industry—reportDec. *121
Perchloroethylene reserved for military use (N)June 86
Peroxide—butyl perbenzoate (A)Jan. 142
Peru—paint-making equipment wantedSept. 186

Petroleum:

- Alcohol from petroleum flowsheetNov. *136
Ethyl alcohol made from refinery ethyleneNov. *96
New pellet dryer for TCC catalyst offers diverse postwar uses. Payne & LechthalerDec. *105
Petroleum byproducts—a big factor in organic chemical industry—reportDec. *121
Petroleum economics (A)Jan. 210
Petroleum in the Middle East (A)July 212
Petroleum now and postwar (A)Mar. 194
Petroleum now and tomorrow (A)July 214
Petroleum policies (A)Dec. 228

 Nomograph for determining critical temperatures. Hooks & Kerse (P.N.).....June 116
 Temperature anticipator (E.N.).....June 126
 Test cabinet (E.N.).....Dec. *131
 Tetramethylene chloride (A).....Nov. 146
- Textile Fibers:**
 Directionally resilient fabric (A).....May 150
 German continuous and staple fibers and related products.....Nov. 206
 Plastic and synthetic fibers have prominent place in British war planning.....Mar. 162
 Synthetic fibers set the formula for a textile revolution report.....Jan. *119
 Synthetic wool (A).....Mar. 138
 Textile finishing in Germany.....Nov. 132
 Textile research (A).....Dec. 222
 Textile fibers see also Cellulose, Rayon, Cotton, Nylon, Vinyon, Wool
 Textile, fluorescent (A).....Apr. 138
 Thallium chemicals under allocation (N).....June 86
 Thermal diffusion as adjunct of electromagnetic process. M. C. Fox.....Dec. *102
 Thermometer, electronic (E.N.).....Feb. *144
 Thermometers—thermometer standardizing with sodium sulphate. John Hole (P.N.).....June *115
 Thermostatic trap (E.N.).....May 138
 Thiophene (A).....Mar. 138
 Timer, industrial (E.N.).....Mar. *125; (E.N.) June 126
 Tin oxides (A).....Apr. 214
 Tires—all synthetic tires (A).....Oct. 144
 Resin emulsifier (A).....Aug. 138
 Trigger control (E.N.).....Sept. *126
- Trucks:**
 Convertible floor truck (E.N.).....Nov. *131
 Handling materials with lifting, tiering and special trucks—report.....Nov. *119
 Lift truck (E.N.).....Jan. *127
 Tunisia—surplus of olive oil.....July 178
 Turbines, gas, uses rotary compressors.....Aug. *111
 Turkey—carbon bisulphide plant planned.....Aug. 174
 What the world expects from the United States.....Feb. 121
 Turpentine—consumption and production of turpentine and rosin 1944 (table).....Feb. 139
 Sulphate turpentine as a chemical raw material (A).....Mar. 196
- U**
- Ultra-violet:**
 Absorption by cellulose derivatives (A).....Sept. 256
 Industrial application of ultraviolet radiation (A).....July 228
 Ultra-violet absorbing plastic (A).....May 149
 U. S. Army reports indexed.....Nov. 220
 U. S. Bureau of Mines get ordnance plant (N).....Dec. 78
 U. S. Navy reports indexed.....Nov. 220
 Upholstery fabric (A).....Sept. 146
 Upholstery, plastic (A).....Aug. 140
 Uranium—conquest of uranium and the atomic bomb.....Sept. *102
 Test developed in Salt Lake City (N).....Nov. 172
 Utah chemical employment (table).....Oct. 180

V

Vacuum:

- Controlled by check valve. C. R. Burkin (P.N.)Dec. *119
Unit vacuum system (E.N.).....June *125
Vacuum equipment for glycerine distillation. G. J. Stockman.....Apr. *100
Vacuum filter (E.N.).....Dec. *132
Vacuum measurement with the McLeod gage. E. W. Flisdorf.....Nov. *102
Vacuum metallurgy (A).....June 194
Vacuum recorder (E.N.).....Feb. *144

Valves:

- Air operated valve (E.N.).....Nov. 132
Bar stock valve (E.N.).....Dec. *130
Cast steel valve (E.N.).....Sept. 126
Diaphragm valve (E.N.).....Jan. *128
Flow control valve for chlorine gas. R. N. Thatcher (P.N.).....Dec. *120
Hard-facing alloy for valves (A).....Oct. 146
How to check valve can control vacuum. C. R. Burkin (P.N.).....Dec. *119
Steel gate (E.N.).....Jan. *129
Vapor-liquid equilibrium for binary systems nomographic chart. C. R. FranklinMar. 117

Varnish:

- Increased acidity of varnish films (A)Dec. 250
Lined varnish oil (A).....June 188
Printing ink, paint and varnish not made by continuous processing. K. S. ValentineMay 224
Silicone varnish (A).....Oct. 141
Varnish and paint flowsheet.....Mar. *130
Varnish resins (A).....Dec. 141
Water resisting varnishes.....Dec. 178
Venezuela—industrial resources investigatedApr. 166
Vinyon—acid-resistant shirts (A).....Dec. 144
Vinyon filament (A).....Feb. 234

- Vitamins—vitamin limitationsApr. 82
Vitamin production (A).....Feb. 220
Volcanic rock processed into building material (A).....Oct. 170
Voltage regulator (E.N.).....Jan. *130
Vulcanization, electronic (E.N.).....Apr. *128
Vulcanizing agents (A).....Feb. 155

W

- Washington, state of—chemical growth continues (A)Oct. *170

Waste Disposal:

- Grape pomace, a source of alcohol and tartrates. E. K. Metzner.....Oct. *103
Industrial waste, an important factor in process planning—report.....Aug. *111
Metal recovery by anion exchange (A)Jan. 208
Not sewage disposal but sewage recovery (A)Aug. 212
Salable byproducts from paper mill wastes (A)Feb. 220
Tartrates recovered from winery wastes. Ze'ev Halperin.....Sept. *116
Utilization of forest-products waste in the Northwest (A).....Jan. 220
Water analyzer (E.N.).....Jan. *128
Water bag, "self-cooling" (A).....Jan. *140
Water de-ioniser (E.N.).....Aug. *126
Water heater (E.N.).....Feb. 146; Nov. *132
Waterproof coating (A).....May 149
Waterproof coating for plant records. C. B. Westerhoff (P.N.).....Dec. 120
Water-proofed voile (A).....Mar. 140
Water still (E.N.).....Sept. *126
Water-test cabinet (E.N.).....Feb. *146
Water treatment—de-ionizing unit (E.N.)Sept. *128
Water treater (E.N.).....Mar. *126
Wax, synthetic (A).....Nov. 148
Weed killer hormones (A).....Nov. 174

Welding:

- Metallic arc welder (E.N.).....Apr. *123
Oxy-acetylene pressure welding (A).....Mar. 208
Welding aid (E.N.).....Aug. 127
Welding process (E.N.).....Apr. *123
Whaling ship launched in England.....Sept. 186
Wheat—prospects for a starch-sirup-dextrose sugar industry from wheat and potatoes in Washington.....June 101
Wick for cigarette lighter (A).....Dec. 142
Wind-up machine (E.N.).....Dec. 131

Wines:

- California winery byproducts recovery 1944 (table).....July 164
Grape pomace, a source of alcohol and tartrates. E. K. Metzner.....Oct. *103
Tartrates recovered from winery wastes. Ze'ev Halperin.....Sept. *116
Windshield wiper for agitator power. Morash & Caldwell (P.N.).....Oct. *127

Wood:

- Impregnated (E.N.).....Dec. 130
Utilization of forest-products waste in the Northwest (A).....Jan. 220
Wood hydrolysis by continuous processing. Raphael Katzen.....May *200
Wool—synthetic (A)Mar. 138

X

- X-rays—loaded ammunition inspected by x-raysMar. *103
X-ray spectrometer (E.N.).....Jan. *128

Y

- Yeast—mold-bran aids production of a grain alcohol. Boyer & UnderhofferDec. *110

AUTHOR'S INDEX

- ACUNA, George. What Central America expects from the United States... Feb. 120
